Draft. Final wording is being reviewed by our Nigerian lawyer and data protection officer.

AI Use Notice

Version 1.0. Effective from 7 October 2026. taxaudit.ng

1. Where we use AI

To read your documents and file them, check your records against each other, explain differences, and answer questions about your records.

2. A person always decides

The AI suggests; you approve. Nothing is filed or changed without a person agreeing, and every suggestion and decision is kept with your records.

3. Who provides it

Claude, by Anthropic, processes AI requests in the United States. Your data isn't used to train AI models. Inputs and outputs are deleted by Anthropic within 30 days by default.

4. Limits

AI can make mistakes. Check suggestions before you rely on them, and ask for a person to review any AI-assisted outcome: see Data protection.

More in our Privacy Policy (section 4).
