1. Overview

TaxAudit helps you prepare complete, consistent records and shows what doesn't agree. It doesn't give tax, legal or accounting advice, and it doesn't file returns on your behalf.

Tax rules and thresholds shown in TaxAudit and our free tax tools follow the Nigeria Tax Act 2025 and are checked by a qualified tax reviewer, but your situation may differ. For advice on your own situation, speak to a qualified tax professional, such as an accountant using TaxAuditPro.

You remain responsible for your filings and payments to the tax authorities.
