Draft. Final wording is being reviewed by our Nigerian lawyer and data protection officer.

Sub-processors

Version 1.0. Effective from 7 October 2026. taxaudit.ng

1. The companies that help us run TaxAudit

- **Render**: runs the application. EU (Frankfurt, Germany).
- **Neon**: database (PostgreSQL). EU (Frankfurt, Germany).
- **Cloudflare**: website delivery, security and file storage (R2), including encrypted backups. Global network; stored files in the EU.
- **Brevo**: sends our emails. EU (Frankfurt, Germany).
- **Sentry**: error tracking, with personal data removed before sending. EU (Germany).
- **Anthropic**: AI features (Claude). United States.
- **GitHub**: source code and automated tests; runs our nightly backup, which it encrypts but can't read. United States.

Not yet in use: PostHog (analytics, only with consent; EU), Paystack and Flutterwave (payments; Nigeria). We update this list before adding a sub-processor. Read our Privacy Policy.
